The Organizator 1.0 - 8/9/2021

The Organizator was born as an event management application. It gives the possibility to manage events and activities, to record user registrations and then define a well-stocked program of activities. Given its flexibility, it is adaptable to any type of context that requires an organization.
Due to its dependences on json file, its easily editable.
The Organizator is an extension of PATonTS, in fact is possible to express the preferences also via Telegram.

Requirement
• Java 8 or above.
• JavaFx 11 or above
• OpenJDK version "16.0.2"

How to Install
Download the .zip file from OneDrive.
Unzip the entire folder.
Based on your operating system, unzip the corresponding javafx-sdk package; if you already have **JavaFx 11 or above,** you can skip this step**.**

How to Open
Open your computer terminal.
Open the folder you've unzipped. (Use 'cd' to move inside a folder, use 'ls' or 'dir' to view the element inside the folder you're in)

First Method:
Write: **java -jar TheOrganizator.jar**

if this doesn't work try with the *Second Method*:
Write:
java --module-path *insert the path to the lib folder inside the javafx-sdk package you've unzipped* **--add-modules javafx.controls -jar TheOrganizator.jar**

It is important that the jar stays inside the same folder of the download.

Guide

As you open The Organizator you'll see the Home page, on the top you'll have on the left a menu, which you can use to navigate, and on the right the Log In button. There's also a Log In button in the middle of the Home page. The Log In is important to use the very specific function of The Organizator: express preferences to specific activities.

Credentials

You may Sign In, but an admin has to approve the request, so here are some standard credentials:

Admin		Users	
Username	**Password**	**Username**	**Password**
admin	123	user	basic
creator	organizator	ari	arru
paton	ts	ale	mondo

Admin actions:
• Can view, add and remove users
• Can change a user into admin
• Can visualize and edit the activities
• Can add new categories
• Can add new activities and options
• Can remove activities or options

User actions:
• Can view the activities
• Express preferences
• Export a file with its activities
• Delete its preferences

TelegramBot

The Telegram Bot allows you to express preferences and use The Organizator directly from Telegram.

You can start the bot from the Home and also you can turn it off.

In order to use the Telegram Bot just follow the buttons and remember: you can always press home, in any moment, to see the main menu.

Info: if the messages disappear, everything is normal. It's our way to keep it clean.
